Abstract:
The business corporation’s are usually established with a read of earning profit kind the business operations. However beneath totally different state of affairs the article of the business corporations is also modified to survival, growth stability etc. it's tough for a business to breathe well while not profit. it should be thought to be a mirror of the operative performance of the business activities. But in the real business atmosphere of nowadays, profit it so, not the sole objective however one of the foremost necessary objectives, which commonly guide and direct business operations. Profit is Associate in tending absolute connotation, whereas gain may be a relative construct, despite being closely associated with a reciprocally interdependent, as they're, profit and gain are two different ideas. In alternative words, in spite of their generic nature, every one of them incorporates a distinct role in business issues. Gain is that the main indicator of the potency and effectiveness of a commerce in achieving its goal of earning profit. Analysis of the gain reveals on however the position of profits stands as a results of total transactions made throughout the year.

Key Words:
Profitability Ratios  Operating Profit Margin Ratio  Gross Profit Margin Ratio  Net Profit Ratio and Return on Capital Employed.

Literature Review:
Dr. Monica Tulsian (2014), Author Published Research on “Profitability Analysis (A comparative study of SAIL & TATA Steel)”. the main purpose of a business unit is to create profit. The profit analysis is finished to throw light-weight on the present in operation performance and potency of business
corporations. It ought to be punctually noted that profits figure alone isn't terribly useful in crucial the potency and performance of the business organisation unless it's related to another figures like sales, price of products sold, in operation expenses, capital invested with etc. Thus the profit ratios are calculated to enlighten the top result and comparison of business corporations which is that the sole criterion of overall potency of business.

**Vipul C. Koradia (2013),** Author describes Profitability Analysis – “A Study of Selected Oil Companies in India”. In this analysis paper, analysis of profit of hand-picked public sector oil firms is undertaken. For the purpose of study, 3 public sector oil firms are Hand-picked.
